**DETAILED ACTION**

***Election/Restrictions***

1. Applicant's election without traverse of Group II, claims 11-14, in the reply filed on 10/20/05 is acknowledged.

***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 11, 12 and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Zysset (4,511,299). Zysset discloses, in fig. 6, an open end for a container comprising an end panel 10 having a core 28; a first double fold 21 defined adjacent to and positioned radially inward from said score, said first double fold defining beneath said score a first outwardly projecting extending cut protection bead; a second double fold 23 defined adjacent to and positioned radially outward from said score, said second double fold defining beneath said score a second inwardly projecting cut protection bead; said end panel being elastically deformed in an area near said score so as to define a concave depression about said score; and a pull-tab 34 affixed to said end panel.

***Claim Rejections - 35 USC § 103***

4. Claim 13 is rejected under 35 U.S.C. 103(a) as being unpatentable over Zysset. It would have been obvious to one having ordinary skill in the art at the time the invention was made to the score of the Zysset invention having an edge radius as

claimed, since it has been held that discovering an optimum value of a result effective variable involves only routine skill in the art. In re Boesch 617 F 2d 272, 205 USPO 215 (CCPA 1980).
